Education

Indian Institute of Information Technology   *Vadodara, IN*

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE, CGPA: 7.8/10   *May 2018*

Skills

Languages   Python, Javascript, Shell scripting
Big Data Tools   Presto, Hive, Airflow, Spark, Kafka, Elasticsearch
Tools/Platform   Flask, Docker, Kubernetes, AWS, Celery, RabbitMQ, Prometheus, Grafana

Experience

SocialCops   *Delhi, IN*

DATA ENGINEER   *Jun. 2018 - Present*

- Led the development and deployment of Ministry of Rural Development India's project DISHA. Developed ETL pipelines using Airflow to power DISHA Dashboard.
- Managed on-premise deployments on NIC's Meghraj Cloud. Deployed the entire stack Vue.js dashboard, ETL pipelines and dashboard modification APIs, ETL pipelines using Debian packages.
- Created a health monitoring service for DISHA deployment using Prometheus and Grafana to alert stakeholders of critical scenarios like failing ETL pipelines, high resource usage, hightraffic on dashboard etc.
- Improved cataloging performance of Catalog component of the product by 90% using Presto and Hive. Improved the data versioning by reducing the storage used by over 80%
- Added features like data deduplication, data extraction from SQL file dumps, data ingestion from S3, running SQL queries in the workflow to Workflows component of the product

Codementor   *Remote*

MENTOR   *Jan. 2019 - Present*

- Took projects involving Python and delivered them within assigned timelines.
- Took 100+ sessions with average 5 star rating and mentored developers in technologies like Python, Airflow, Spark and assisted them in problem solving

SocialCops   *Delhi, IN*

DATA ENGINEER INTERN   *Jan. 2018 - May 2018*

- Built a data integration framework using celery with support for state management and incremental data ingestion.
- Worked with data scientists and Bussiness intelligence team to build ETL pipelines using Airflow to power analytics and dashboards
- Worked on building system native packages (Debian and RPM) of data integration services and ETL pipelines written in Python.

Projects

Human Detection and Tracking   *Vaodara, IN*

PROJECT LEAD   *June 2016*

- A command line application built with OpenCV and Python to detect individual humans and track them using their faces
- The application provides an API to users to train their own face datasets, the feature was built to support use cases like surveillance systems. The project has got 600+ stars, available on Github.

PQusic   *Vaodara, IN*

PROJECT LEAD   *October 2016*

- PQusic is a web application to listen audio songs, manage playlists and see trending songs
- Implemented the application using Python, Django, HTML, CSS and vanilla JS
